

For Odors Associated with	Dilution Ration	How to Use
Garbage Bin	1:100	Spray the inside of the trash can or wipe it with a damp rag. Lightly mist the surrounding area as needed.
Kitchen Waste	1:100	Spray at the beginning and end of the pile, or every week as needed. Keep the moisture level below 30%. Turn the pile regularly.
Garden Compost	1:100	Thoroughly saturate the compost with the diluted solution. Do not turn the compost and cover it for the best results. Apply once a month.
Farming / Cattle Breeding	1:100	Once a week or as needed.
Sewage / Drainage	1:50	Add weekly, monthly, or as needed. For best results, keep it covered.
Livestock and stable operations	1:500	Spray once a week or when needed.
Pet Odour	1:100	Spray the diluted solution over the affected area. Note: Test on light-colored fabrics first to check for color changes.
Carpets and Floor Mats	1:20	Spray the cleaned mat until it is slightly damp. Allow it to dry, and reapply if needed.
Waste water/ Drainage Lagoons	1:100	Spray over the top or apply at different points around the edge and center of the lagoon. Apply once a month or as needed.
Shoes and Sports Gear	1:50	Spray inside or outside of shoes and gear. Let it dry and reapply if needed. Note: Test on light-colored fabrics first to check for color changes. For best results, clean the item with a non-antibacterial organic soap.
Smoke Fumes	1:10	Spray the diluted solution on the affected area. Note: Test on light-colored fabrics first to check for any color changes.

Zypact is a cutting-edge Natural Digester Technology designed to tackle the toughest odours. By leveraging natural biological processes, Zypact effectively breaks down organic matter, neutralizes foul smell, and promotes a clean, sustainable environment.

Zypact is an effective solution for managing odour. It works quickly by targeting and breaking down odour molecule and continues to control over time. Zypact eliminates odours by breaking down the compounds that cause odour, and supports odour free environment by speeding up the decomposition of organic matter. It is versatile and can be used in homes, businesses, factories, and etc. Using Natural Digester Technology, Zypact relies on special bioactive agents that help break down organic waste into harmless by products. Like water and carbon dioxide, making them environmentally friendly and sustainable option.

Advantages: No chemicals, Natural source, Non toxic combo of probiotic of enzyme technology safe for people and environment.

APPLICATIONS OF ZYPACT

RESIDENTIAL :
Eliminate kitchen and bathroom odours, manage pet waste, and freshen living spaces.

COMMERCIAL :
Ideal for restaurants, hotels, and office spaces to neutralize odours in waste bins, grease traps, and drains.

INDUSTRIAL:
Effective in odour control management for waste treatment plants, landfills, and factories to control large - scale odour and waste challenges.

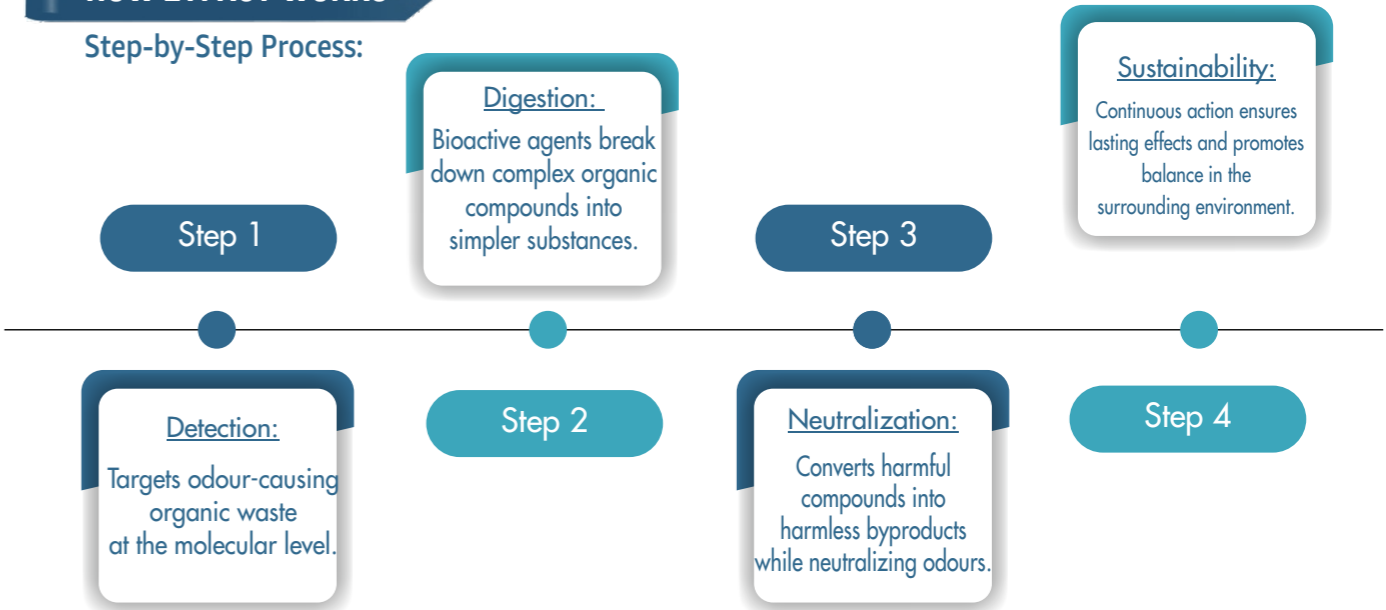

AGRICULTURAL :
Reduce odours in animal housing and agriculture.

HOW ZYPACT WORKS

Step-by-Step Process:

A CLEAN FLOW DIAGRAM SHOWING:

PRODUCT INFORMATION

Available Forms : Liquid concentrate
Packaging Options : Eco-friendly packaging in sizes ranging from small consumer bottles to industrial bulk containers.

DIRECTIONS FOR USE:

- Use the diluted amount use manual spray or automatic spray system at frequent intervals within 1-2 days for maximum effectiveness.
- Do not spray into air or use as an air freshener.

Safety Information:

Safe for direct contact with surfaces and compatible with most materials.
Store in a cool, dry place. Keep away from direct sunlight.
